

COMPRESSED AIR FILTER ELEMENTS

www.airfluxfiltration.com

Certificate No. :KLR 601450

FILTER ELEMENTS FOR COMPRESSED AIR & TECHNICAL GASES

The quality of filter elements has a vital and significant role because the standard purification of compressed air and technical gas is continually increasing. Supported by a well qualified team of engineers and advanced manufacturing practices, we are committed to provide the most cost effective solution for your filtration needs.

Optimize your Compressed Air System

Upgrade your compressed air system by using the new Airflux Filtration filter element range and optimize the energy efficiency of your operations. The filter elements are available in numerous variations to make them fit into the housings of most popular filter brands.

Our performance is not just a promise - its proven! Due to the validation of the filter elements according to ISO 12500-1 and 12500-3, performance data are absolutely comparable.

The fast lane to the choice of the appropriate filter element : In a cross reference table, you will find exactly the element you need. The quick availability is guaranteed. Replacing a filter element is easier today than ever !

Airflux Filtration provides compressed air replacement filter elements compatible for the most market leading brands:

- ATLAS COPCO
- AFE
- ALUP
- ABAC
- BEA FILTRI
- FUSHENG
- HANKINSON
- HIROSS
- INGERSOLL RAND
- KAESER
- MIKROPOR
- TECHNOLAB
- ULTRA FILTER
- WALKER
- COMPAIR
- CECCATO
- DELTECH
- DOMNICK HUNTER
- DONALDSON
- FRIULAIR
- OMEGA
- OMI
- ORION
- SMC
- SULLAIR
- SWAN
- ZANDER
- OEM

AIRFLUX HIGH-EFFICIENCY FILTER ELEMENTS

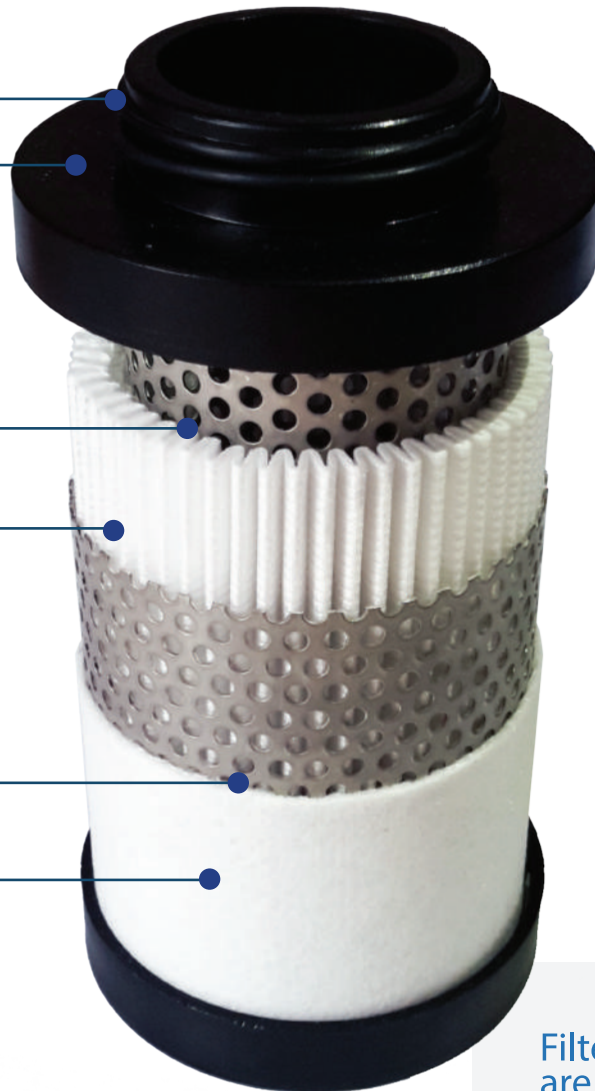

AIR TIGHT - Positive 'O'ring seal prevents contamination by-pass.

CHEMICAL RESISTANT - Tough corrosion resistant end caps withstand the worst compressed air condition.

96% VOIDS VOLUME - gives long life with minimum energy costs.

HIGH EFFICIENCY - Anti re-entrainment barrier prevents oil/water carry over and is compatible with mineral or synthetic lubricants.

MAXIMUM STRENGTH - Inner and outer stainless support screens up to 10 bar Δp .

Filter element changes are essential

FILTRATION GRADES

GF

General filtration for solid contaminant

Particle removal down to 3 micron
 Air quality ISO 8573.1 Class 3
 Initial pressure drop 0.03 bar

AF

High efficiency filtration for particle, oil & water aerosol

Particle removal down to 0.01 micron
 Oil content down to 0.01 mg/m³
 Air quality ISO 8573.1 Class 1
 Initial pressure drop 0.09 bar

PF

Pre-filtration for particles, oil & water aerosols

Particle removal down to 1 micron
 Oil content down to 0.1 mg/m³
 Air quality ISO 8573.1 Class 2
 Initial pressure drop 0.05 bar

AC

Absorption filtration for oil vapour & other hydrocarbon

Oil content down to 0.003 mg/m³
 Air quality ISO 8573.1 Class 1
 Initial pressure drop 0.10 bar
 (Always Proceed with Grade AF filter)

* The above rating is based on operational condition at 7 bar g and 20°C

ATTENTION!

CHANGE ELEMENT

every year or earlier if indicator change to red

10 / 2015
 month year

All Airflux coalescing filter are supplied with a maintenance sticker. It is essential to change the filter elements every year or earlier if the indicator/gauge change to red.

Activated carbon filter elements (grades AC) should be changed every 1000 hours or earlier if odour is detected.
